BARIX

Annuncicom PS Touch

Desktop IP Intercom and paging master
station with touch screen, PoE powered.

The Barix Paging Station Annuncicom PS Touch is a universal, TCP/IP connected intercom
station for use in IP Intercom, Paging and VoIP applications. The PS Touch directly connects
to the network via a 10/100Mbps network connection, and is powered over the network
interface (PoE, 802.3af standard).

The station can be used as a master station for IP based intercom and paging systems,
which can be built without any central servers or PCs.

The PS Touch is equipped with a touch screen display, an XLR connected professional
gooseneck microphone and a built-in speaker. Optional flash memory for stored messages
and announcements is available.

Annuncicom PS Touch is delivered with Barix Simple Paging Master station firmware or as
an IC Paging talk station. Additional firmware support on request.

Applications
