

Superb Performance, Built-to-Order

Drawing from years of experience and industry leading technologies like Complex Conic waveguides, TA/TX loudspeakers are designed to meet the needs of today's Installed-AV professionals, with a broad range of systems to provide effective solutions for every sound reinforcement challenge at competitive price points.

The new T Series loudspeakers incorporate the newest generation of Complex Conic horns, with the latest drivers to provide clean, natural sound and tight pattern control. Unlike conventional loud-speaker designs, Complex Conic horns provide consistent beam-width over a wider frequency range, with the natural, transparent sound that Renkus-Heinz is known for.

Made in the USA and fully customizable with the options you've come to expect from Renkus-Heinz including multiple horn dispersions, mounting and mobile options, custom color and weather resistance.

Applications

- The TX/TA118S is an 18" direct radiating subwoofer perfect for any application where, deep, tight and accurate bass is required.
- Used singly, it's the perfect match for adding sub bass to 12 & 15 inch loudspeakers and larger steerable arrays.
- In multiples, it's an impressive and powerful addition to any system requiring a powerful subwoofer.
- The standard pole socket allows loudspeakers to be easily mounted on it as a base in portable systems.

Appealing Design, Sizable Performance

The TX/TA118S was developed for applications needing a powerful, high performance subwoofer in a versatile package—at an attractive price.

It features a 4" voice coil, cast frame, treated paper cone woofer. The high-efficiency 18" woofer produces a very deep, tight bass response and the large ports insure that no chuffing or fluttering noise ever mars the sound.

A 900 watt program power rating leads to a surprisingly high 131 dB peak output level from 35 Hz to 120 Hz; the TX/TA118S is a great match to nearly any system.

Designed In Flexibility

Twelve M10 Universal Mounting Points make installation easy and clean. A 35 mm pole socket allows even large full range loudspeakers to be used in portable applications with the sub as a support. Standard recessed handles make for easy portable use and are inconspicuous in installs.

Available externally powered or with four flavors of built-in amplification; RHAON II networking, monitoring and control, and Dante digital audio, the TX/TA118S brings new levels of versatility to compact loudspeakers.

TA/TX Series

TX118S	Non-Powered
TA118S-A	Powered, Analog
TA118S-RN	RHAON Empowered
TA118S-RD1	RHAON & Dante
TA118S-RD	RHAON & Dante Redundant

Direct Radiating 18 in. Subwoofer

- **Eighteen-inch Woofer for Excellent Bass Response**
Strong performance to 35 Hz.
- **Versatile**
Recessed handles, pole adapter and UMH points are all standard.
- **Build-to-Order Flexibility**
Custom color and IP55 Weather Resistant finishes are available.
- **Available SA1250 Amplifier**
SA1250 amplifier offers high output, full protection limiting, analog, and optional AES & Dante inputs.
